

RN AND LPN PAID RESIDENCY PROGRAM

Are you a new grad nurse looking for your first nursing job?

Our **HOME NURSING RESIDENCY** offers RNs/LPNs with less than one year of experience an exciting employment opportunity to master skills that take most nurses a lifetime to learn! Nurse Residents enter an intensive four-week training and education program, and then work twelve months (or 2,000 hours) with our medically complex, ventilator-dependent **PEDIATRIC AND ADULT** patients in their homes.

“Initially, when I began working at IPI as a new grad, I thought that I would miss out on maximizing my critical thinking skills, as well as, experiencing complex cases that I would gain in a hospital; however, I could not have been more wrong.”

-Marquina W., MSN, RN

Skilled Hourly Home Nursing

Home Health Visits

Respiratory Home Medical Equipment
